MODULAR BUILDING SYSTEMS FOR COVID-19 CARE

Quickly create temporary, semi-permanent and permanent rooms within hospitals, medical centers and health care facilities. As a Clean Build alternative to traditional construction, VCraft Designs' pre-engineered systems require minimal onsite cutting and fabricating which minimizes contamination threats and helps for infection control.

BENEFITS OF PORTABLE COVID19 CARE CENTER

FAST & EASY TO INSTALL

Pre-engineered systems can be assembled quickly with minimal training.

DUSTLESS, CLEAN INSTALLATION

Requires minimal on-site construction and fabrication.

EASY TO CLEAN

Smooth, uniform wall surfaces allow for easy disinfection.

REUSABLE

Modular components allow for unlimited design potential.

VERSATILE

Easily expand, relocate or reuse to adjust to changes in demand.

HIGH QUALITY MATERIAL

Tested in accordance with ASTM E-84 requirements for flame spread and smoke density

PE STAMPED DRAWINGS

Able to meet stringent construction guidelines (additional cost applies).

SOUNDPROOF

Sound attenuating foam cores reduces sound transmission.

SOLUTIONS FROM A PROVEN LEADER

As a leader in supplying construction solutions to hospitals throughout the country for decades, VCraft Designs' systems and design experience are ideal for solving interior construction needs.

01.

Proven and Certified Results

In addition to providing systems to meet the ICRA's and CDC's standards for the construction of airborne infection isolation rooms, VCraft Designs has outfitted hospitals across the country compounding rooms for years.

02.

Unmatched Selection

VCraft Designs offers the most proven line of modular cleanroom systems. From our ultra-versatile F2000 system to our popular Series 300 and OmniFlex systems, we are able to provide an effective solution for every space and application.

03.

Experienced Team

With over 40 years of experience designing and manufacturing cleanrooms and environmental enclosures worldwide, you will benefit from our decades of knowledge. We not only manufacture quality systems but we can assist architects and construction companies with the design and engineering of quality solutions that comply with most building codes and industry standards.

AIRBORNE INFECTION ISOLATION ROOMS

Our modular systems can be used to create negative pressure isolation rooms and deployable AIIR shelters as well as temporary wall systems for segmenting corridors and creating quarantined areas in all type of hospitals and health

01

Seamless Integration with Filtration Systems

With decades of experience in developing systems for both negative pressure and positive pressure rooms, VCraft Designs has the building systems and engineering experience to help you control infection.

02

Integration of Various Door Systems

VCraft Designs' wall systems are designed to integrate seamlessly with a wide variety of door options including single, double, sliding and other specialized doors. Single and double doors are stocked and can be outfitted with door closers and hospital push pull latches.

03

Rigid Partitions & Proper Airflow

Our in-house engineering team and extensive network of local distributors understand the need for proper air flow when outfitting isolated areas. VCraft Designs' systems are designed to accommodate the air

DEPLOYABLE SHELTERS

Shelter Features

- Optional Pass Thrus
- Ceiling Systems
- Multiple Window Styles
- Unlimited Wall Panel Configurations
- Low-Energy Fan Filter Units
- Various Door Styles

When communities need to respond quickly to large-scale disasters and emergencies, V-Craft Designs' line of modular building systems are an ideal solution. They can be used to create structurally sound rooms and buildings that can be rapidly deployed and built on site in a quick, clean manner with minimal disruption to the surrounding area.

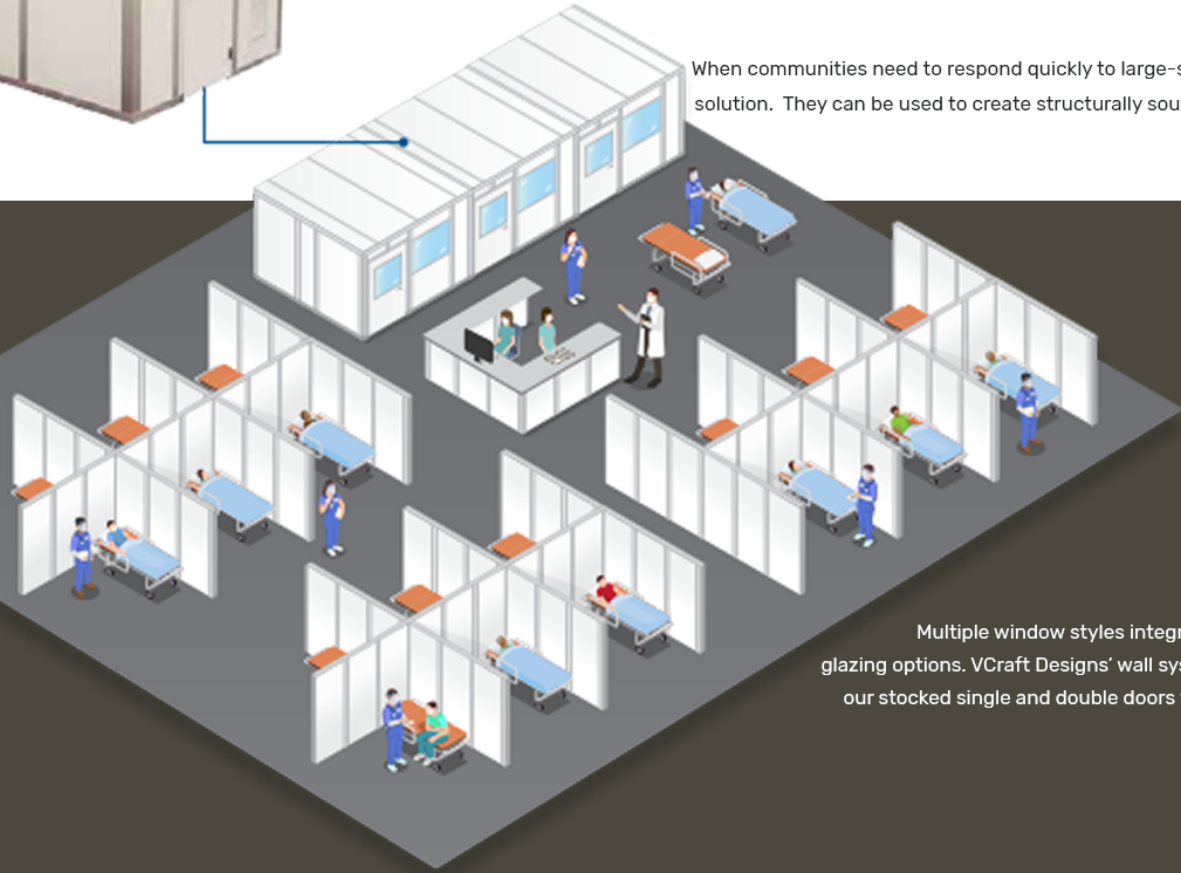

Modular Cleanroom Walls

Drawing on our decades of experience in developing cleanroom systems used within the medical and pharmaceutical industries, V-Craft Designs' systems are ideal for maintaining strict environmental control - over air quality, pressure and temperature - while offering a high rate of cleanability.

V-Craft Designs' has earned a reputation in the industry for engineering and manufacturing some of the strongest modular building systems on the market. Simply put, our CleanLine Wall Systems allow us to build bigger, stronger interior rooms.

Windows & Doors

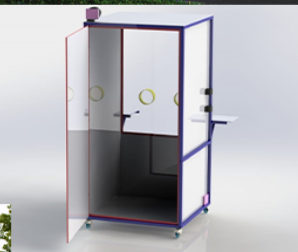

Multiple window styles integrate seamlessly with our modular wall systems and can be specified with a variety of sizes and glazing options. V-Craft Designs' wall systems are designed to seamlessly integrate a wide variety of door options. Options range from our stocked single and double doors with standard self closing hardware to more sophisticated sliding, roll-up and specialty doors.

COVID-19 ISOLATION CENTERS & CLINICS

We want to achieve the highest client satisfaction. We pride ourselves on being a creative, professional and involved partner. Our main drive is to make sure you achieve your goals.
